## **Update on Tiger Education Pack Project - Progress to Date March 2004**

### **Tiger Education Packs**

The tiger educational kits will be used in Biology and Ecology classes at secondary schools and in zoos in Russia. The packs will consist of;

- Teachers guides
- Posters
- Tiger book

### **Children's Tiger Education Book**

We are using a very old and out of date book written by Mr Vasily Solkin as the template for an updated book with new information and new ideas. Team Design in Moscow (who publish the British Embassy magazine as well as other high quality magazines) are taking the basic information and original ideas to create a new and modern book. The design process is now underway.

Please see attached spread sheet for book printing budget.

### **Posters I**

We are designing and preparing 4 colourful posters.

- I. Amur tiger - origin, habitat, population numbers:
- II. Prey base, food chains, dependence on prey animals
- III. Life cycle of a tiger (male, female tigers, litter, cubs, breeding)
- IV. Conservation efforts, poaching, smuggling, derivatives use, CITES, anti-poaching activity;

But we may decide only to print 2 of these four posters depending on final printing quotes etc.

### **Posters II**

The tiger posters created in Russian for the 21<sup>st</sup> Century EAZA Tiger Campaign will also be reprinted to put into the teaching pack.

### **Teacher's Guide**

The guide for teachers is currently being written.
